Calm

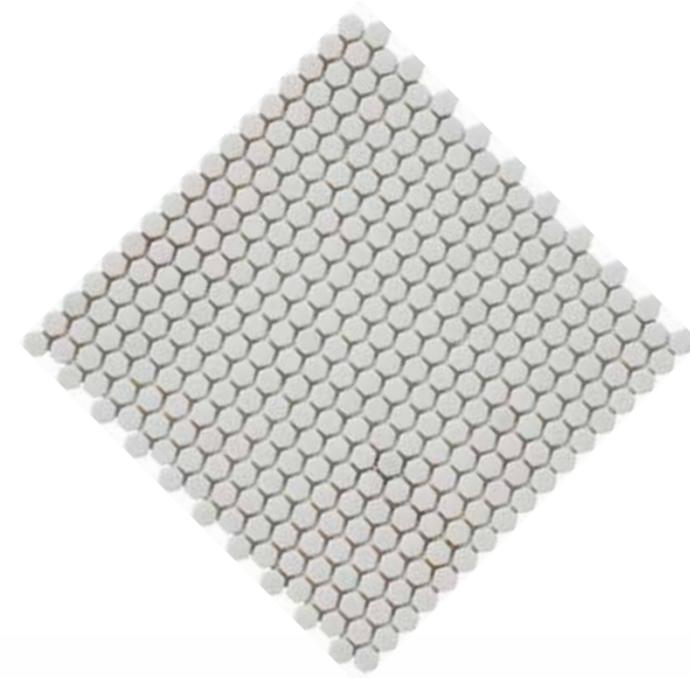

Esta exclusiva selección de mosaicos enmallados trabajados en cristal con acabado mate y aspecto satinado, nos traslada a espacios sobrios pero cálidos al mismo tiempo. Las formas geométricas y la paleta cromática en la que se presentan generan sensación de calma y quietud en su conjunto.

This exclusive selection of mesh-backed matt glass mosaics with a satin finish, takes us to sober but warm spaces at the same time. The geometric shapes and the color palette presented collectively generates a sense of calmness and tranquility.

Atelier

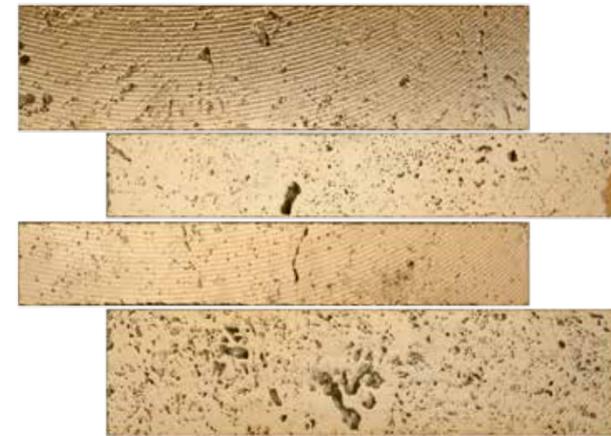

Calidad, elegancia, lujo y distinción definen la colección 'Atelier'. Una gama de producto trabajada delicadamente sobre piedra natural para obtener los más ricos detalles. Todo ello aderezado con elementos acabados en pan de oro o pan de plata que le otorgan un carácter único apto para todo tipo de revestimientos.

Quality, elegance and a deluxe air of distinction are the watchwords behind Atelier. This stone-effect collection has a delicately worked design full of rich subtle nuances, enriched with gold or silver leaf. The end result is a tile collection with a unique personality, suitable for use on any wall surface.

Art Nouveau

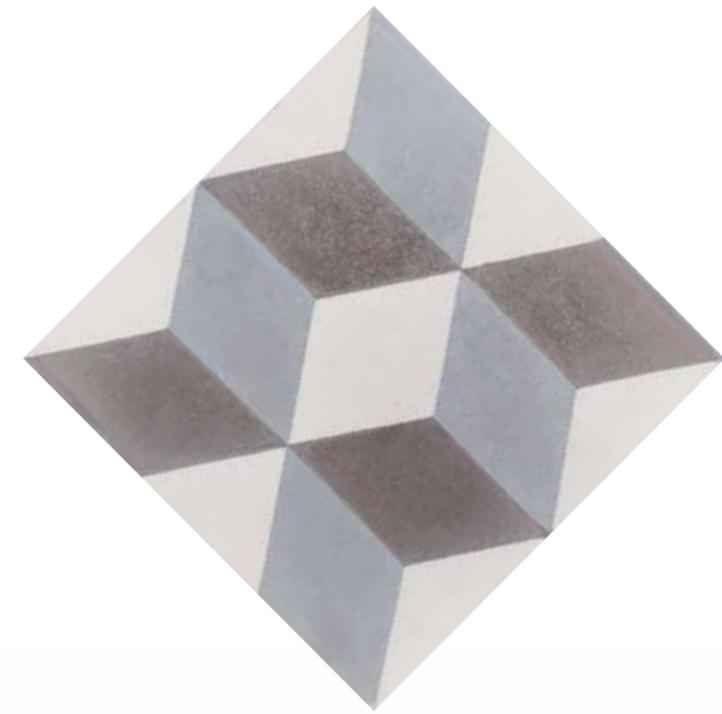

Harmony by Peronda nos traslada al siglo XIX con esta colección de pavimento hidráulico inspirado en el patrimonio modernista 'Art Nouveau' rescata diseños propios de la época y los adapta a materiales únicos con la misma esencia pero características técnicas mejoradas. Indicado para pavimentos interiores, esta colección está diseñada tanto para uso doméstico como para locales públicos.

Harmony by Peronda takes you back to the 19th century, with an encaustic cement floor tile collection inspired by Modernist heritage. Art Nouveau has revived patterns from the Modernist period and adapted them for use in unique products with the same essence as the originals but with the added benefit of improved technical characteristics. Suitable for use on indoor floors, the collection can be used in both homes and public premises.

Emphasize

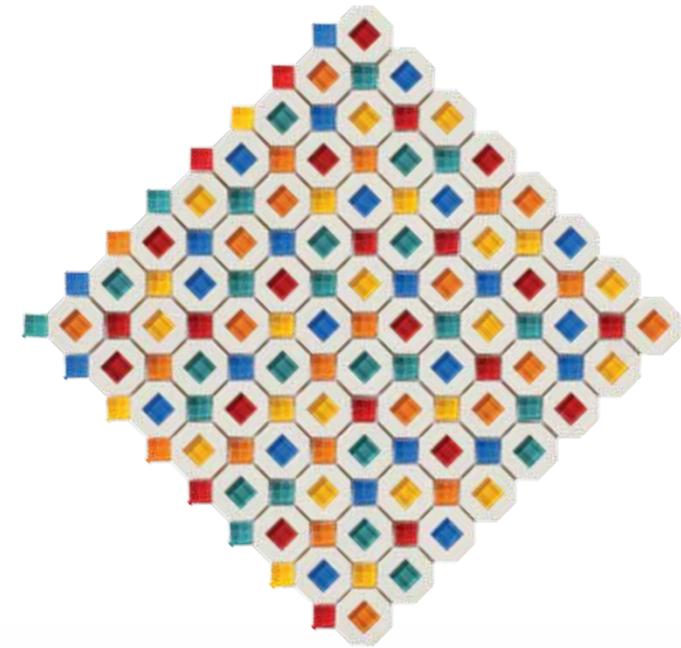

El detalle marca la diferencia. La colección 'Emphasize' se caracteriza por la minuciosidad de los detalles de sus mosaicos. Detalles propios de confecciones textiles, que combinan diferentes texturas y materiales para apelar a los sentidos y la exclusividad.

Attention to detail is what truly makes a difference. The Emphasize collection stands out for the minute attention given to the finer details of its mosaics, evocative of fabrics. Emphasize appeals to the senses by combining different textures and materials to exclusive effect.

Stylish

A las características intrínsecas de Harmony como el diseño, la elegancia y la calidad, se unen para esta colección la modernidad y la sobriedad. 'Stylish' es una línea decorativa cuyo principal elemento es el metal, para recrear espacios de marcado carácter urbano y funcional. Combinado con otros productos neutros aporta a los ambientes ligereza y minimalismo.

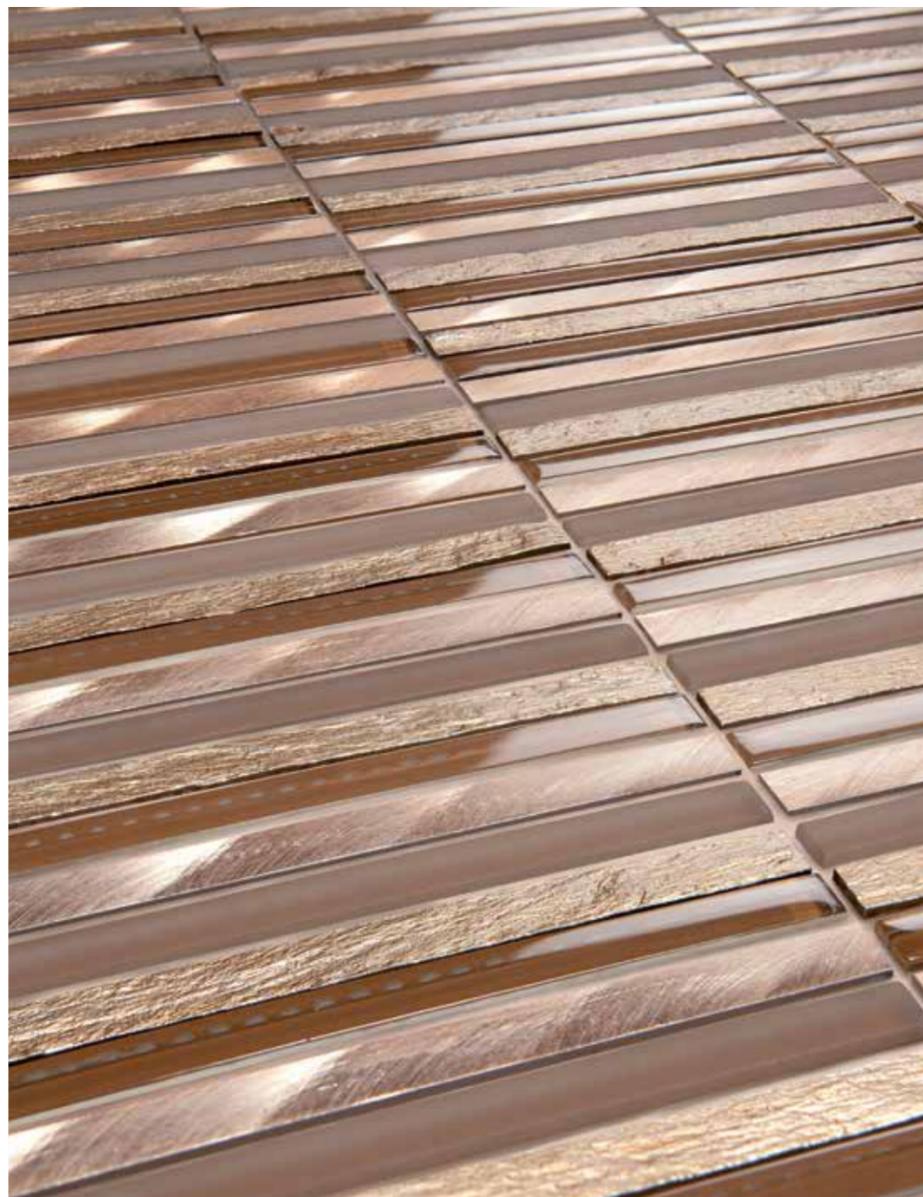

In addition to Harmony's intrinsic characteristics, such as its design appeal, elegance and quality, this collection also stands out for its sobriety and modern air. Stylish are decorative coverings mainly based on a use of metal perfect for settings with a functional, urban air. Combined with other neutral products, they can add a lightweight, minimalist feel to living spaces.

Shapes

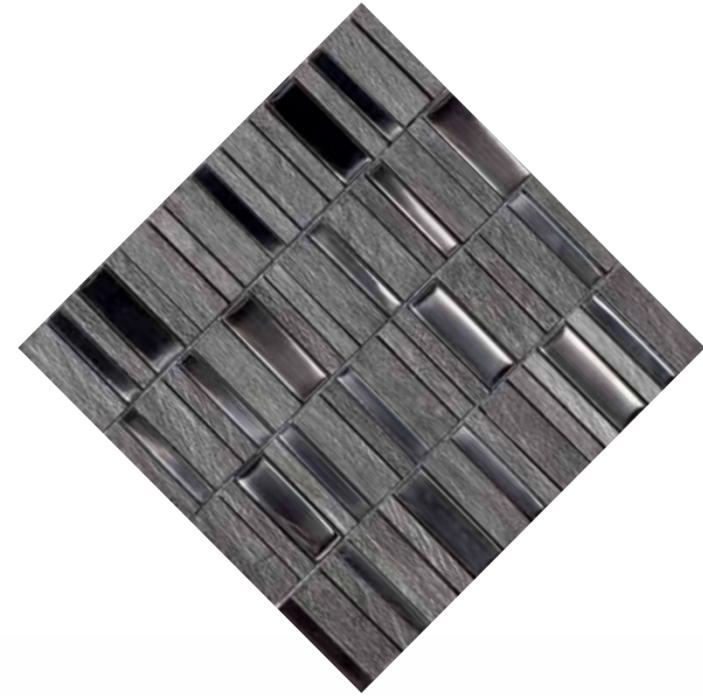

La riqueza de elementos y la combinación entre ellos diferencian los productos de la colección 'Shapes'. Mosaicos decorativos que trabajan la composición de texturas y colores, diferentes acabados y detalles para conseguir una serie de decoración única. Sus juegos de formas y tonalidades ofrecen la posibilidad de crear composiciones totalmente únicas.

Shapes is a collection conspicuous for its rich variety of mosaics and possible combinations. These decorative mosaics' main hallmarks are their blend of textures and colours, different finishes, and finer details, guaranteeing decorative results that are absolutely unique. Through interplay with shape and colour, unparalleled combinations can be achieved.

Nature

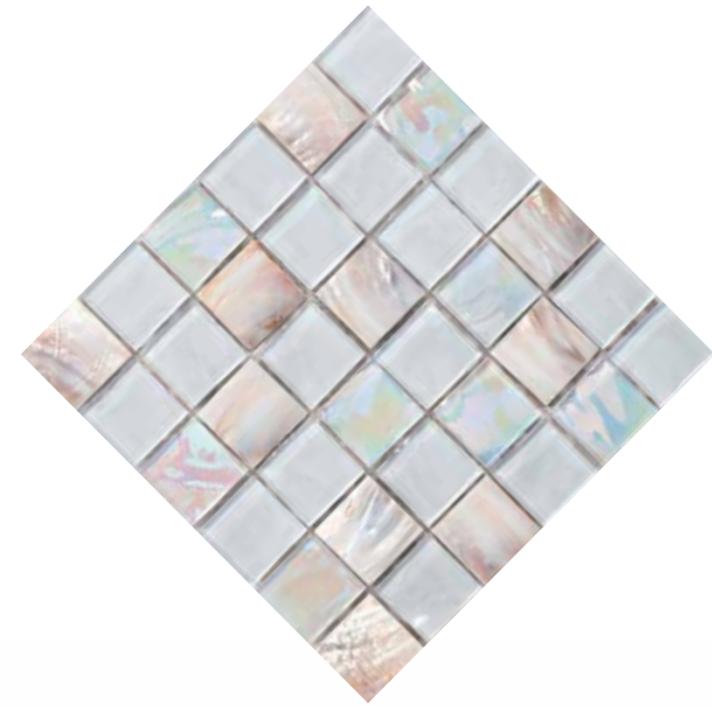

La materia pétreo es el componente principal y la inspiración de esta colección. Aprovechando las irregularidades naturales de la piedra, 'Nature' juega con las diferentes posibilidades de acabados para conseguir un producto único y diferente en cada una de sus piezas.

Stone is the main component and source of inspiration of this collection. Taking advantage of stone's natural irregularities, Nature explores the different possibilities that finishes offer in a series of products that are each uniquely distinctive.

Brilliant

El cristal como objeto de deseo. La colección 'Brilliant' es una exclusiva colección mosaico con acabado vítreo. Su luminosidad combinada con las posibilidades que ofrece su diseño, convierten a 'Brilliant' en una colección perfecta para aportar elegancia y distinción como decoración complementaria a todo tipo de revestimientos.

This exclusive mosaic tile collection with its vitreous finish pays tribute to glass as an object of desire. Thanks to its luminosity and broad design potential, Brilliant is an unparalleled choice as a complementary decorative feature, lending a touch of elegance and distinction to all wall surfaces.

River Stone

Incluido en el proyecto Peronda Fashion Lab, esta colaboración con el estudio de diseño integral 'Dsignio' revisa el concepto del canto rodado para crear una espectacular colección de encimera, espejo y lavabo de formas redondeadas y materiales nobles. Talladas en piedra de una sola pieza, tanto la encimera como el lavabo, están disponibles en tonos gris antracita y beige.

This initiative with the global design studio Dsignio formed part of the Peronda Fashion Lab project, in this case directed at reinventing the concept of round pebbles in a spectacular round-shaped countertop, mirror and washbasin collection, made of fine materials. Carved out of a single piece of stone, the countertop and washbasin are available in a choice of anthracite grey or beige.

Goah Nature

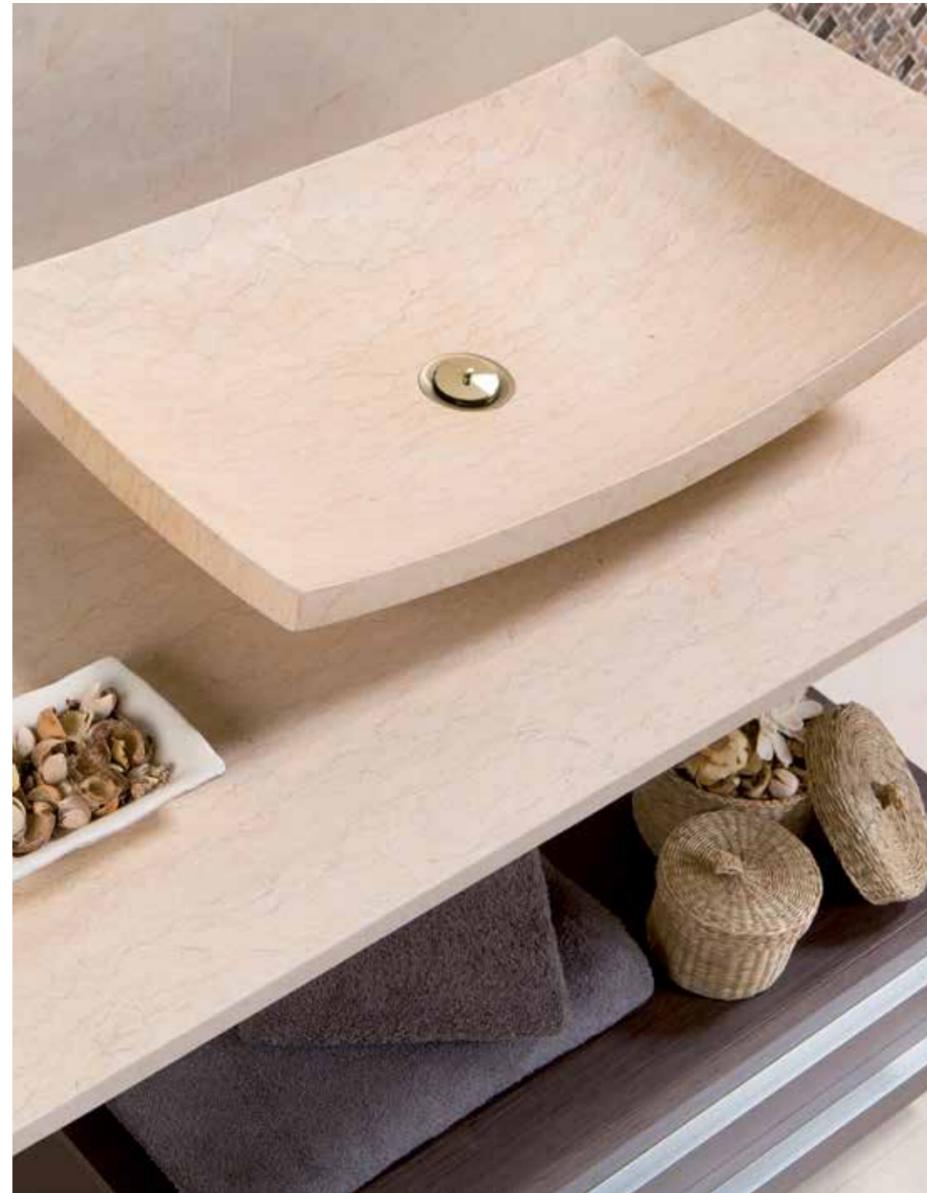

Exclusiva colección de encimeras y lavabos en piedra natural para baños. Desde el mármol 'Heritage' de origen español a los ónices más exclusivos traídos desde Irán o Afganistan característicos por su transparencia como piedra semipreciosa. Mármoles egipcios y piedras de la zona de Mongolia o clásicos como el mármol 'Travertino' italiano, otorgan un carácter único a todo tipo de ambientes.

An exclusive bathroom countertop and washbasin collection made of different types of natural stone, such as Spanish Heritage marble, exclusive semi-precious transparent onyxes from Iran or Afghanistan, Egyptian marble, Mongolian stone, or classics like Italian Travertine marble. Conceived to stamp a unique hallmark on settings of all kinds.

Queen

Una bañera de fundición de hierro esmaltada en titanio. De aires clásicos, destacan sus soportes de estilo barroco. Es perfecta para cualquier estilo de baño, gracias a su particular diseño que permite crear desde un ambiente clásico y romántico hasta uno moderno o de inspiración vintage.

A titanium-enamelled cast iron bath, Goah Queen stands out for its classical allure and baroque feet. With a design suitable for bathrooms of all styles, it can fit in with classical, romantic, modern or even vintage décor.

12829 PRINCESS-N FEET-W P-105

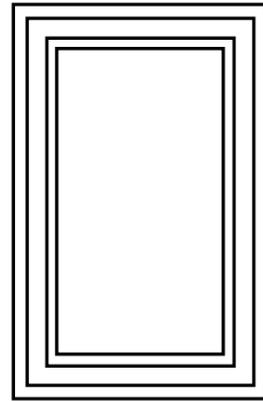

LA BAÑERA PRINCESS CUMPLE CON LAS SIGUIENTES NORMATIVAS: THE AMERICAN ASME A112.19.1-2008, THE CANADIAN CSA B45.2-08, THE EUROPEAN EN232:2003 AND EN 14516 AND ENGLISH BS EN232:2003 AND BS EN 14516. EL TIPO DE ESMALTE UTILIZADO EN LA BAÑERA PRINCESS LE CONFIERE UNA RESISTENCIA AL ÁCIDO Y A LOS PRODUCTOS ALCALINOS, A LAS BACTERIAS Y POSIBLES HONGOS. DE ESTE MODO LOS HEDORES NO QUEDAN ADHERIDOS A LA SUPERFICIE DE LA MISMA, CONVIRTIENDO LA BAÑERA EN UN PRODUCTO ALTAMENTE HIGIENICO.

PRINCESS BATHTUB COMPLIES WITH THE FOLLOWING NORMS: THE AMERICAN ASME A112.19.1-2008, THE CANADIAN CSA B45.2-08, THE EUROPEAN EN232:2003 AND EN 14516 AND ENGLISH BS EN232:2003 AND BS EN 14516. THE CLASS AA ENAMEL USED IN THE PRINCESS BATHTUB IS RESISTANT TO ACIDIC AND ALKALINE PRODUCTS, KEEPS IT SPARKLE, SMELLS DO NOT LINGER ON IT AND NEITHER BACTERIA OR FUNGI ADHERE TO IT, MAKING THE BATHTUBS HIGHLY HYGIENIC.

Clásicos

Esta colección de complementos decorativos y mobiliario para baños, toma sus referencias de los grandes clásicos, tanto de inspiración barroca como clasicista. 'Goah Clásicos' nace como complemento de la colección de Peronda Cerámicas 'Clásicos' y de la misma manera, ofrece posibilidades decorativas para cualquier espacio donde el cuidado por el detalle sea un factor fundamental.

This collection of complementary decorative items and furniture for the bathroom is inspired by the great classics from the Baroque and classical periods. Designed to complement Peronda Cerámicas' Classics tile collection, Goah Classics opens up new decorative potential in all bathrooms where priority is given to attention to detail.

Siga atentamente estas instrucciones para asegurar una correcta colocación. Los productos de la serie Harmony, debido a su fabricación artesanal y al empleo de materiales especiales en su elaboración (piedras naturales, vidrio, metales, resinas, etc.) puede presentar variaciones de calibre, textura, diseño y tono. Estas variaciones dan al producto una personalidad propia y unas características irrepetibles. La instalación se debe realizar por un profesional cualificado. Antes de la colocación, asegúrese de que el material esté en perfectas condiciones. Revise tonos, acabados y calibres ya que PERONDA no aceptará reclamaciones o devoluciones de materiales ya colocados.

Antes de cada etapa, probar en una pieza todos los materiales y herramientas a utilizar y valorar el acabado final de la prueba. En caso de no conseguir el acabado deseado, no proseguir con la colocación y consultar con nuestro equipo comercial.

1. PREPARACIÓN PREVIA DE SUPERFICIES

La superficie donde se va a colocar el recubrimiento, debe ser firme y estar perfectamente limpia y nivelada.

Si existen desniveles superiores a 2 mm, utilizar productos adecuados para nivelar la superficie a recubrir. Se debe reparar cualquier grieta e imperfección, para que la pared quede totalmente lisa. La humedad de la pared debe ser inferior al 2%.

2. ELECCIÓN DEL MATERIAL DE AGARRE

En la tabla de características técnicas de producto, se detalla el material de agarre recomendado para cada artículo. No colocar exceso de material adhesivo y seguir las instrucciones del fabricante del adhesivo.

3. CONSEJOS DE COLOCACIÓN

- Utilizar el lado liso de la llana dentada para extender el cemento-cola uniformemente sobre el muro, a continuación extender el cemento-cola con el lado dentado (dentado mínimo recomendado de 3 mm), evitando que queden huecos vacíos sin adhesivo. No se debe extender el cemento-cola en grandes superficies para evitar que éste se seque antes de colocar el producto Harmony sobre él.
- Tras colocar la malla se debe presionar con una llana de goma para obtener una buena adhesión y eliminar los posibles huecos sin adhesivo que hayan podido quedar, asegurándose que la distancia entre las mallas sea igual a la que hay entre cada una de las teselas.
- Antes de proceder al rejuntado se recomienda que dejar secar durante 24 horas.
- Hay que evitar que los restos de material de colocación endurezcan y queden adheridos a la superficie de las piezas. Para limpiar los restos de material de colocación antes de que hayan endurecido, se recomienda usar una esponja no metálica y abundante agua.
- Para proceder al rejuntado todas las piezas deben estar completamente limpias y sin residuos o polvo. Para efectuar las juntas, extender el producto especial para juntas con una espátula de caucho, rellenando bien las juntas en toda su profundidad y siguiendo las pautas de fabricante. Este producto de rejunte debe ser de granulometría fina con el fin de no rayar la superficie de fraguado rápido, con una excelente resistencia mecánica, baja absorción de agua y anti-moho. Antes de que fragüe completamente se deben retirar los restos del mismo con una esponja o trapo para evitar que éstos queden adheridos a la superficie.

4. CORTE Y PERFORADO

Para realizar cortes rectos, se recomienda cortar la pieza por la costilla (cara no vista) para disminuir el descantillado.

Para realizar perforaciones, utilizar una broca específica para vidrio (se recomienda utilizar brocas huecas acabadas en diamante). La broca debe estar constantemente refrigerada por agua. Utilizar el taladro a bajas revoluciones y sin percutor. No presione con fuerza, deje que la broca vaya perforando gradualmente para evitar roturas en los bordes o grietas posteriores. Extremar las precauciones en la parte final del proceso de perforado.

5. LIMPIEZA Y MANTENIMIENTO

Para la limpieza cotidiana se recomienda la utilización de un paño húmedo, evitando el empleo de medios de limpieza abrasivos. No se recomienda el uso de máquinas de limpieza con vapor a alta temperatura, por existir posibilidad de afección sobre el acabado superficial.)

No serán aceptadas reclamaciones si no se han tenido en consideración las indicaciones aquí descritas.

Follow these instructions carefully to ensure the correct fixing of the materials. Due to the handmade manufacturing process and the use of special materials (natural stone, glass, metal, resin, etc.) in the makeup of the Harmony products, variations in calibration, texture, design and shade may exist. These variations give the product its own personality and unique characteristics.

Installation must be performed by a qualified professional. Before installation, ensure that the material is in perfect condition. Check colors, finishes and sizes as PERONDA will not accept any complaints or returns after installation.

Before installation, test one-piece with all the materials and tools you intend to use and evaluate the results of the test. If you fail to achieve the desired finish, do not proceed with the installation and consult with our sales team.

1. SURFACE PREPARATION

The area where you intend to apply the material should be firm and perfectly clean and level.

If unevenness greater than 2mm exists, use suitable products to level the fixing surface. Any cracks or imperfections that may exist on the surface must be repaired, so that the surface is completely flat. Dampness of the fixing surface must be less than 2%.

2. SELECTION OF FIXING MATERIALS

The recommended fixing material for each product is detailed in the table for technical characteristics of the product. Do not use excessive adhesive and follow the adhesive manufacturer's instructions.

3. INSTALLATION ADVICE

- Use the smooth side of the trowel to spread the mortar evenly over the wall, then spread the mortar with the notched side (recommended teeth depth minimum 3 mm). Do not leave any areas empty without adhesive. Do not spread the mortar over large areas; the Harmony will not adhere to semi-dry adhesive.
- Once the mesh has been fixed, it must be pressed with a squeegee to get a good bond and eliminate any gaps that may appear without any adhesive and make sure that the distance between each mesh is equal to that between each of the tiles.
- Prior to grouting it is recommended that you allow the material to dry for 24 hours.
- Ensure that no loose fixing materials are allowed to dry, harden and adhere to the surface of the pieces. To clean the remnants of the fixing materials before they harden, we recommend the use of a non-metallic sponge and plenty of water.
- To proceed with the grouting all parts must be clean and completely free of debris and dust. To make the joints, extend the grouting material using a rubber spatula designed for mosaics, ensuring that all joints are filled to their depth and following the grout manufacturer's guidelines. The grout should be fine-grained (in order not to scratch the surface of the pieces) and fast setting with an excellent mechanical strength, low water absorption and mildew. Before the grout sets completely remove all the remains using a sponge or damp cloth to ensure that no remains are allowed to adhere to the surface.

4. CUTTING AND DRILLING

To carry out straight cuts, you should cut the back face (internal face) to reduce chipping.

For drilling holes, use a specific drill bit for glass (we recommend using diamond-headed drill bits). The bit must be constantly cooled with water whilst drilling.

Set the drill at a low speed and never in hammer mode.

Do not apply force; allow the bit to gradually drill the hole so as to avoid breaks or cracks on the edges post drilling. Exert extreme caution at the end of the drilling process.

5. CLEANING AND MAINTENANCE

For daily cleaning we recommend the use of a damp cloth, avoid the use of abrasive cleaning methods. The use of high temperature steam cleaning machines is not recommended, as this may possibly have a detrimental on the surface finish of the material.

No claims will be accepted if the above guidelines have not been adhered to.
