SOLAIRE BY LUCA NICHETTO

LUCA NICHETTO

LUCA NICHETTO

Luca Nichetto was born in 1976 in Venice. He studied at the city's Istituto statale d'arte, before undertaking a degree in industrial design at the Università Ca' Foscari di Venezia, from which he graduated in 1998.

In 1999, Nichetto began his professional career with Murano based glass maker Salviati, later becoming a product designer and consultant for lighting company Foscarini. In 2006, he founded his eponymous practice in Venice. In 2011 he moved to Stockholm, Sweden, to open a second studio and he continues to live in and work from this city.

Over the course of his career, Nichetto has served as art director for many international design brands and he has developed an in-depth knowledge of the design industry. He has lectured and led workshops at various universities, including serving as a professor of design at the Università Ca' Foscari di Venezia, as well as sitting on juries for assorted international design competitions.

Nichetto's work has been exhibited worldwide and has been the subject of retrospectives in cities such as Venice, London, Paris and Stockholm. He has been awarded numerous international design awards for his highly researched, innovative design projects, which range across products, furniture and accessories, as well as incorporating architecture and exhibition design.

Referring to everything related to the sun, the French word “solaire” defines also the quality attributed to those who are capable to illuminate the space around with their own presence. Solaire Porcelain Tiles embody this quality, aiming to create a constant dialogue between light and ceramics inspired by materials often used in architecture. Different textures and patterns, series of dots in low relief play all together with a range of colours and finishings, interacting with the evolution of light. As a result, shadows and reflections cast vibrations and movements, altering the perception of a surface that contrasts with the natural features of the ground.”

Solaire is a collection which gives the opportunity to the light to embody, to bring to life raster, graphic and sculpted surfaces. The surfaces become versatile volumes. So much that each of them enlivens and modifies the perception of the surfaces themselves as well as the space relatively to the evolution of light. Hollows give way to reliefs. This project showcases the qualities of the light combined with the ones of the ceramic. The light reveals, transforms, influences sensations. The ceramic is shaped, plasticity and emotion. As the light is moving material, this collection is an infinite combination to discover, to play with. Also, the patterns resulted from the technical structures contrasting with the natural ground texture.

The Solaire collection by Luca Nichetto in the gaze of KlunderBie photographers: The peculiar sophisticated yet also fun vision of these Dutch photographers interprets the collection signed by Luca Nichetto to achieve a playful dialogue full of intelligence, curiosity and an infallible eye for the unexpected.
